

## HOW TO REGISTER -- TEACHERS.

First, why register? Many of SciLinks utilities depend on a link between teacher and student. The only way to facilitate that is if both parties -- teacher and student -- are registered. It only takes a moment, and it's free. And SciLinks requests minimal information, so it is easy.

1. Click on "Register" in in the cranberry toolbar.
2. Then click on "Teacher"

### Registration

Registration with SciLinks is optional. However, registering provides many additional user benefits. Teachers may add students using their class roster once they have registered and logged in. For details, click on "Why Register?" in the Quick Links.

3. In this page, enter your first and last names, email address, and –if you have one – your NSTA membership #. It is optional, but if you happen to be an NSTA member, you’ll gain broader access to SciLinks materials via keyword search.

Then, select a “Retrieve account question,” supplying an answer. This will enable us to reveal your password to you down the road should you forget. You will also create a user name and password on this page.

If you find your username is *already in use*, try a variation. Add your last name, a pet, or some number meaningful to you.

4. Next, pick your school. Your students will use your school to find you in the SciLinks database.
